

MECHANICAL INSTALLATION

STEP 1 Fig. 1. Using (top half) as a template, mark hole locations in a convenient location under your dash. For a secure installation use at least three of the sheet metal screws and washers provided.

STEP 2 Fig. 2. Remove the top half cover of the CB transceiver. Locate the bottom half of the slide bracket assembly on the top cover of the radio, drill your holes and using the nuts and bolts included, mount the top half cover of the radio to the slide bracket as shown.

STEP 3 Re-install the top half of the CB case to the radio (making sure that none of the screws are touching the internal radio components).

STEP 4 Carefully dress the wires of both halves of the slide bracket out of the slide path of the connectors so that no wires are pinched upon inserting the radio.

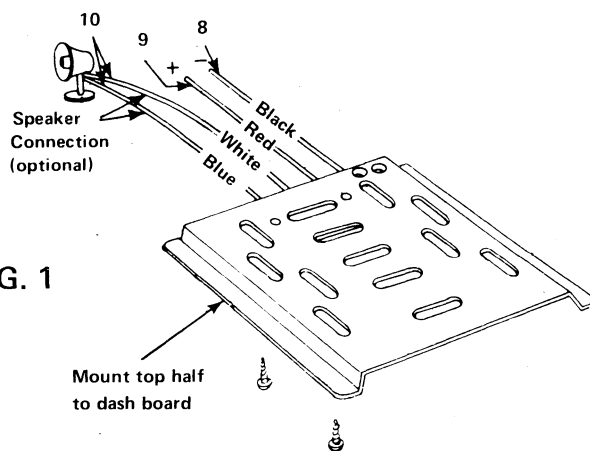

FIG. 1

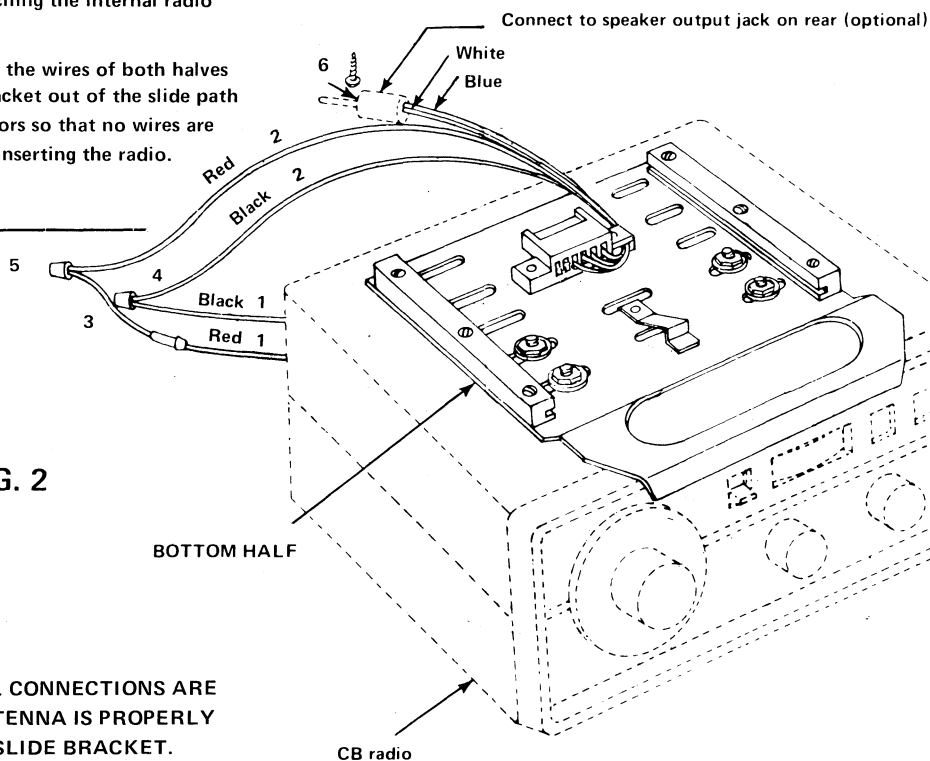

FIG. 2

MAKE SURE THAT ALL ELECTRICAL CONNECTIONS ARE SECURELY TAPED, AND THE CB ANTENNA IS PROPERLY CONNECTED BEFORE USING YOUR SLIDE BRACKET.

ELECTRICAL INSTALLATION

1. Cut the BLACK (-) ground wire and the fused RED (+) wire coming from the CB unit about 3½ inches past the fuse.
2. Cut the BLACK and RED wires coming from the Slide Mount BOTTOM HALF about 3½ inches from the Slide Mount.
3. Strip about ½ inch of insulation from the four ends.
4. Splice the BLACK wires together and tape securely.
5. Splice the RED wires together and tape securely.
6. If an external speaker is used, connect the WHITE and BLUE wires from the Slide Mount BOTTOM HALF to a miniature jack plug (not supplied) and plug into the external speaker receptacle on the back of the CB unit. If an external speaker is not used, tuck the wires carefully away.

7. Strip about ½ inch of insulation from the BLACK and the RED wire coming from the TOP HALF of Slide Mount.
8. Connect the BLACK wire of the TOP HALF of the Slide Mount to the car chassis ground.
9. Splice and tape the RED wire of the TOP HALF of the Slide Mount to any fused hot line in the car.
10. The BLUE and WHITE wires from the Slide Mount TOP HALF are to be connected to an external speaker. If an external speaker is not used, tuck the wires carefully away.

REMEMBER TO DISCONNECT CB ANTENNA BEFORE REMOVING UNIT
