DRIVE 3G-S

weBoost brings you seamless, uninterrupted cellular connectivity in your vehicle. Your cell phone is an essential part of your life – especially when you're on the go.

The weBoost Drive 3G-S™ cellular signal booster is a simple, effective solution to maintain effortless communication in your vehicle. It's designed to work with all smartphones and virtually any other cell phone.

Installation is simple – no tools required. All you do is connect a small magnetic antenna outside your car to the booster cradle, which will provide your phone with the strongest, most reliable signal possible.

weBoost improves your coverage—including 3G data—no matter who your cellular carrier is in the United States and Canada. When your phone is placed in the convenient booster cradle, the Drive 3G-S will amplify the cellular signal, providing the coverage you deserve for essential voice and data connections.
