- Garmin® StreetPilot™ models: c310, c510, c530, c550, c580.

Air Vent Mounting Instructions

Step 1. Choose a suitable vent location for installation. **Do not place mount in or near an air bag deployment zone or where it will obstruct view of the road.**

Step 2. Attach the vent mounting clips (A) to the back of the pedestal (B) with the vent clips correctly positioned with the flat sides facing up.

Step 3. Attach your GPS device to the pedestal mount ball head by firmly pushing ball (C) into the socket on the back of the original device power cradle (D) (not included) as pictured below.

Step 4. Pinch the vent mounting clips (E) so that the teeth open and gently insert vent pedestal into vent louvers until the mounting clips are attached to the fin/blade of the vent. Adjust the spacing between the mounting clips if necessary. Adjust the support leg (F) vertically until it rests firmly along the bottom of the vent or dash surface below the vent. It will need to support the weight of the cradle and device.

Step 5. Position the your GPS device as desired.

GPS Device and Vent Clip Removal

Step 1. The GPS unit must be detached from the device power cradle.

WARNING: Failure to separate the GPS unit from the original manufacturers power cradle before attempting to remove the vent mount could result in permanent damage to the vehicle's air vent louvers.

Step 2. Pinch the vent mounting clips to the open the teeth. Carefully slide the pedestal from the vent fin/blade. Make sure the vent clips teeth are open enough so that they clear without damaging the vent. Please call our technical service department if you are having trouble removing the vent clips at (626) 254-9005.
