

1 Find a Location for Stratus 7 and Mount it

Select either the **Dash Mount** method or the **Vent Mount** method for your Stratus 7. You will need a phillips-head screwdriver to complete the installation.

Dash Mount Method:

IMPORTANT: The air temperature needs to be at least 60°F to install the Dash Mount. If needed, turn on the heater in your vehicle.

- A. Select a flat surface for the Dash Mount with ample room for Stratus 7. Avoid mounting on leather surfaces. Choose a location that doesn't interfere with the driver's vision or access to driving controls, one that won't interfere with the deployment of airbags or other safety equipment, and makes Stratus 7 easily accessible for operation. (Airbag locations are typically marked with "SRS" logos.)

- B. Orient the adhesive foot so that Stratus 7 is easily accessible. Loosen the knob and adjust the adhesive foot to position **1** or **2**, and then tighten it.

- C. Attach the Dash Mount to the *PowerConnect* Vehicle Dock using the 4 provided screws.

- D. Clean the mounting surface in the vehicle with the alcohol preparation pad and let it dry thoroughly.

- E. Once the surface is dry, remove the adhesive liner. Press and hold the Dash Mount in place for 30 seconds. Allow the adhesive to cure for 2-4 hours.

- F. You can tilt the dock mounting plate in your preferred direction.

Vent Mount Method:

- A. Select a vent with ample room for Stratus 7, one that won't interfere with the deployment of airbags or other safety equipment, and makes Stratus 7 easily accessible for operation. (Airbag locations are typically marked with "SRS" logos.)

- B. Some vents have recessed louvers. If yours are recessed, remove the regular vent clamps and install the extended vent clamps.

- C. Attach the Vent Mount to the *PowerConnect* Vehicle Dock using the 4 provided screws.

- D. Install the Vent Mount onto the vehicle vent. (Note that for clarity the illustrations below do not show the Vehicle Dock attached to the Vent Mount.)

- i. Insert the vent mount into the vent opening.
- ii. Push until hooked on the rear of the vent louver. Rest the foot against the bottom of the vent.
- iii. If necessary, adjust the tilt of the Vent Mount by repositioning the foot to a different tilt adjustment hole.

2 Mount the Magnetic Mount Antenna

- A. Mount the Magnetic Mount Antenna outside your vehicle, on a clean and dry horizontal surface that will always face the sky.
- B. Choose the location for the antenna according to your type of vehicle. Center it between the left and right sides, and away from other antennas.

- C. Attach the Rubber Tail to the antenna and press the antenna cable into the Rubber Tail. Use the Rubber Tail to position the antenna the correct distance from the edge of the roof or trunk lid.

- D. Clean the surface of the selected mounting location using the alcohol preparation pad and let it dry thoroughly. Peel the protective material from the adhesive strips and press the Rubber Tail firmly into place on the vehicle for 30 seconds. At room temperature (68° F), maximum adhesion usually occurs within 72 hours. During this period, avoid car washes and other contact with the antenna and the Rubber Tail.

4 Connect the PowerConnect Power Adapter

- A. Insert the *PowerConnect* Power Adapter into your vehicle's cigarette lighter or power adapter socket. Plug the other end into the **red PWR** connector on the left side of the *PowerConnect* Vehicle Dock.
- B. Place Stratus 7 into the dock and press the **Power** button.

3 Route the Antenna Cable

NOTE: These instructions are for a sedan or coupe where the antenna is mounted above the front windshield. The Stratus 7 User Guide (with Vehicle Kit) has detailed antenna cable routing instructions for all types of vehicles. Go to www.siriusxm.com/guides for the User Guide.

- A. Tuck the antenna cable under the windshield rubber molding and run it to the nearest corner.
- B. Route the cable out of the molding and into the rubber weather stripping around the door opening.
- C. Lift the weather stripping. Tuck and run the cable inside it to the bottom of the door opening. Replace the weather stripping.
- D. Pull the cable out and route it to Stratus 7.
- E. Plug the Magnetic Mount Antenna connector into the silver **ANT** connector on the right side of the *PowerConnect* Vehicle Dock.

TIP: Include enough slack in your routing to accommodate open doors or the hood lid. Coil any excess cable in a hidden location and keep it away from any vehicle pedals or controls.

5 Verify Signal Reception

- A. Be sure the vehicle is outside and the antenna has a clear view of the sky.
- B. Verify that you are receiving the Sirius signal. The Stratus 7 Radio should be tuned to Sirius channel 184, the Preview channel. There should at least be two bars in the upper right corner of the screen that denotes antenna signal strength. If not, be sure that you have mounted the antenna on the outside of the vehicle, as shown in step 2, and that the vehicle is parked outdoors with a clear view of the sky. Move the vehicle away from any obstructed area, for example, if you are parked in a garage, or parked near a large structure.

- C. You can also press and hold **menu**, and press **▼** to scroll to and highlight **Signal**. Press the **Select** button to display the **Signal** screen. The Satellite and Terrestrial bars show the strength of the signal being received. If the signal reception is good, press and hold **menu** to return to Sirius channel 184, the Preview channel.

STRATUS 7 QUICK START GUIDE

Self installation instructions and tips are provided for your convenience. It is your responsibility to determine if you have the knowledge, skills and physical ability required to properly perform an installation. SiriusXM shall have no liability for damage or injury resulting from the installation or use of any SiriusXM or third party products. It is your responsibility to ensure that all products are installed in adherence with local laws and regulations and in such a manner as to allow a vehicle to be operated safely and without distraction. SiriusXM product warranties do not cover the installation, removal or reinstallation of any product.

6 Connect the Audio

Decide on one of the following in-box audio connection options. You can also refer to “Step 6: Connect the Audio” in the Stratus 7 User Guide (with Vehicle Kit) for additional audio connection options, such as a cassette adapter or the FM Direct Adapter (FMDA) (both sold separately). Go to www.siriusxm.com/guides for the User Guide.

Option 1: Best: Use the provided **Aux In Cable**, if your vehicle's stereo system has an auxiliary input jack.

- A.** Plug one end of the cable into the **green AUDIO** connector on the right side of the **PowerConnect** Vehicle Dock and the other end into the auxiliary input jack on the vehicle's stereo system.

- B.** Turn on your vehicle's stereo system and set it to play from the auxiliary input source.

- C.** You should hear Sirius channel 184 through your vehicle's stereo system. The installation is complete.

TIP! Refer to your vehicle's owner's manual to find the location of the auxiliary input jack, or consult the vehicle dealer.

Option 2: Good: Use the **PowerConnect** feature of Stratus 7. **PowerConnect** plays the Sirius audio through your vehicle's FM radio.

- A.** Find and make a list of all available FM channels in your area that are not being used by an FM radio station.

- B.** Pick the first FM channel on your list. Tune your vehicle's FM radio to this FM channel.

- C.** Set your Stratus 7 to transmit on the same FM channel:

- i.** Press and hold **menu** until the menu options are displayed.

- ii.** Press **▼** to scroll to and highlight **FM Settings** and press the **Select** button.

- iii.** If **FM Channels** is not highlighted, press **▲** to highlight **FM Channels**. Press the **Select** button.

- iv.** Press **▼** to scroll to and highlight the storage location **FM2**. Press the **Select** button.

- v.** Tune to the FM channel you found in step 1. Press **▼** and **▲** to tune in steps of .2, i.e., 99.3 to 99.5. Press **◀** and **▶** to tune in steps of 1, i.e., 99.3 to 100.3. Press the **Select** button to select the FM channel.

MATCH FM CHANNELS

- vi.** The FM channel you selected will be confirmed on the display screen and Stratus 7 will tune to the FM channel.

- D.** You should hear Sirius channel 184 through your vehicle's FM radio. If you are satisfied with the sound quality the installation is complete.

- E.** If you are not satisfied, move to the next FM channel on your list and repeat the process. Continue until you have found an FM channel with which you are satisfied.

7 Subscribe

Subscribe your Stratus 7 to the Sirius service:

- A.** Make sure your Stratus 7 is turned on, receiving the Sirius signal, and tuned to Sirius channel 184, the Preview channel, so that you can hear the Sirius audio.

- B.** Make a note of your Sirius Radio ID. You can find it by selecting **Radio ID** in menu items, by tuning to channel 0, on a label on the bottom of the gift box, and on the label on the back of your Stratus 7.

184 Preview
To Activate Call
1-866-635-2349

*The phone number shown above may differ from the one shown on your Stratus 7. All numbers are valid.

- C.** To subscribe:

- Online: Go to www.siriusxm.com/activatenow to access or set up an online account, subscribe to the service, and activate your Radio.
- OR
- By phone: Call **1-866-635-2349**.

Activation usually takes less than 5 minutes, but sometimes may take longer. We recommend that your radio remain on until activated. When your service is activated, your Stratus 7 will display an alert message. To continue, press any button.

Press **▲** or **▼** to tune to other channels, and **◀** or **▶** to browse the different categories of channels. Learn what all the buttons do in the panel below.

Stratus 7 Button Functions

Power Button
Press to turn Stratus 7 on and off.

FM / Menu Button
FM: Press to access and cycle through FM presets.
Menu: Press and hold to access advanced features and configuration options; in configuration options, press and hold to return to main display screen.

Up and Down Buttons
Press to preview and tune channels through the channel lineup; also press to scroll through lists and highlight menu items.

Select Button
Press to confirm selection of highlighted items in a menu or list; when not in a menu or list, press first before entering the channel number, to directly tune to a channel. Press and hold to go back to the previous channel.

Jump Button
Press to directly access traffic and weather for the city of your choice; or press it to go back to the previous channel to which you were listening.

Left and Right Arrows
Press to search for channels by category.

Number Buttons
Press to tune to a stored favorite channel, press and hold to store a favorite channel; also enter a channel number.

Stratus 7 Main Display

When listening to a channel, information about the channel and what is currently playing is displayed.

Channel Name or Category Name
Channel Number — 051 BPM
Artist Name — Black Eyed Peas
Song Title — Rock That Body
Signal Strength

FCC Statement: The user is cautioned that changes or modifications not expressly approved by Sirius XM Radio Inc. can void the user's authority to operate this device. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: 1. This device may not cause harmful interference. 2. This device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the installation instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: •Reorient or relocate the receiving antenna of the affected receiver. •Increase the separation between the SiriusXM equipment and the affected receiver. •Connect the SiriusXM equipment into an outlet on a circuit different from that to which the affected receiver is connected. •Consult the dealer or an experienced radio/TV technician for help. WARNING! The FCC and FAA have not certified this Satellite Radio Receiver for use in any aircraft (neither portable nor permanent installation). Therefore, Sirius XM Radio Inc. cannot support this type of application or installation.

? What's in the Box?

CAUTION: Do not attempt to install, activate, or adjust any of the setting options described in this Quick Start Guide unless your vehicle is parked in a safe location.
